- Extra 2" x 8" lumber required for internal blocking.

OPTIONAL ACCESSORIES

- * Safety Bumper / Flip-Up Cleats
- * Floating Dock Ladder
- * Pipe Holders / Chain Retainers

Note: Dock Builders Supply assumes no responsibility or liability for the design, structural integrity, accuracy or completeness of this sketch/drawing. Sketch is provided as a guide-line only. Dimensions are approximate. Internal stringer blocking over the perimeter of dock floats is not shown, but should be incorporated throughout the frame to provide additional dock float mount points. Dock floats should be on-hand during construction to use as a templates to accurately align internal stringers over the perimeter of floats. Lumber is not included in dock kit and must be acquired locally.
